

REGIONAL CONDITIONS
LOUISIANA

The following Nationwide Permits have no regional conditions in effect in the State of Louisiana: 1, 4, 9, 10, 11, 16, 17, 21, 24, 28, and 34.

The following Nationwide Permits have regional conditions as follows:

NWP 2, Structures in Artificial Canals.

No regional conditions for work outside of the Louisiana Coastal Zone or for non-commercial activities within the Louisiana Coastal Zone.

For commercial activities within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 5, Scientific Measurement Devices.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

No regional conditions or restrictions for work within the coastal zone provided that no wheeled or tracked vehicles are used in wetland areas and weirs or flumes constructed under this NWP are to be temporary and removed upon abandonment. Otherwise, this NWP is considered denied without prejudice because of denial of coastal zone consistency by the Louisiana Department of Natural Resources, Coastal Management Division within the Louisiana Coastal Zone.

For projects that do not meet these provisions, individual requests for approval under this NWP will be considered on a case by case basis upon receipt by the appropriate Corps of Engineers district of an individual coastal use permit, waiver, or other approval by the Louisiana Department of Natural Resources, Coastal Management Division.

NWP 8, Oil and Gas Structures in OCS waters.

The applicant must obtain a consistency concurrence from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

NWP 13, Bank Stabilization.

No regional conditions for work outside of the Louisiana Coastal Zone.

Except as described below, there are no regional conditions within the Louisiana Coastal Zone.

The NWP is considered denied without prejudice because of denial of coastal zone consistency by the Louisiana Department of Natural Resources for activities within the Louisiana Coastal Zone that:

- a. are proposed in vegetated wetlands or streams designated part of the Natural and Scenic Streams System of Louisiana, or
- b. exceed 250 feet in length and 250 cubic yards of material, or
- c. use fill material other than clean sand, gravel, clam or oyster shell, quarried rock or stone which is free of metal products, organic material, and unsightly debris or
- d. new bulkhead construction, or
- e. involve the use of wheeled or tracked vehicles in wetlands.

Individual requests for approval under this NWP will be considered on a case by case basis upon receipt by the appropriate Corps of Engineers district of an individual coastal use permit, waiver, or other approval by the Louisiana Department of Natural Resources, Coastal Management Division.

NWP 15, U.S. Coast Guard Approved Bridges.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 18, Minor Discharges.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions are in effect for work outside of the Louisiana Coastal Zone.

This NWP cannot be used in conjunction with NWP 14 or NWP 26 to increase the footprint of the impact.

NWP 19, Minor Dredging.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 20, Oil Spill Cleanup.

For work within the Louisiana Coastal Zone, the applicant must obtain authorization from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 22, Removal of Vessels.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 23, Approved Categorical Exclusions.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 25, Structural Discharges.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 26, Headwaters and Isolated Waters Discharges.

This NWP is considered denied without prejudice because of the denial of water quality certification by the Louisiana Department of Environmental Quality.

Individual requests for approval under this NWP will be considered on a case by case basis upon receipt by the appropriate Corps of Engineers district of an individual water quality certification, other approval, or waiver from the Louisiana Department of Environmental Quality.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work in addition to a water quality certification as stated above.

This NWP cannot be combined with NWP 14 or NWP 18 to increase the footprint of the impact area.

NWP 30, Moist Soil Management.

No regional conditions or restrictions are in effect for work outside of the Louisiana Coastal Zone.

Except as described below, there are no regional conditions or restrictions within the Louisiana Coastal Zone.

This NWP is considered denied without prejudice because of denial of coastal zone consistency by the Louisiana Department of Natural Resources, Coastal Management Division within the Louisiana Coastal Zone for activities that:

- a. use wheeled or tracked vehicles in wetlands, or
- b. in cases where the repair or replacement of any water control structure would involve any change in size or in the operating schedule of the original structure.

Individual requests for approval under this NWP will be considered on a case by case basis upon receipt by the appropriate Corps of Engineers district of an individual coastal use permit, waiver, or other approval by the Louisiana Department of Natural Resources, Coastal Management Division.

NWP 31, Maintenance of Flood Control Facilities.

This NWP is considered denied without prejudice because of denial of water quality certification by the Louisiana Department of Environmental Quality.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit from the Louisiana Department of Natural Resources, Coastal Management Division for any work in natural waterbodies prior to commencement of work in addition to an approval from the Louisiana Department of Environmental Quality.

Natural waterbody is defined by the State of Louisiana, Division of State Lands, as the waters of and in all bayous, rivers, streams, lagoons, lakes and bays and the beds thereof.

NWP 32, Completed Enforcement Activities.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 33, Temporary Construction and Access.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 35, Maintenance Dredging of Existing Basins.

No regional conditions or restrictions are in effect for work outside of the Louisiana Coastal Zone.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work, if the work is located in natural waterbodies or in areas of known sediment contamination.

Natural waterbody is defined by the State of Louisiana, Division of State Lands, as the waters of and in all bayous, rivers, streams, lagoons, lakes and bays and the beds thereof.

NWP 36, Boat Ramps.

No regional conditions or restrictions are in effect for work outside of the Louisiana Coastal Zone.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work, if the work is located in natural waterbodies or vegetated wetlands.

NWP 37, Emergency Watershed Protection.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.

NWP 38, Cleanup of Hazardous Waste.

For work within the Louisiana Coastal Zone, the applicant must obtain a Coastal Use Permit or other approval from the Louisiana Department of Natural Resources, Coastal Management Division prior to commencement of work.

No regional conditions or restrictions for work outside of the Louisiana Coastal Zone.
